# COMMUNITY MEETINGS

# slido

On November 7, 2023, the voters of Paulding County will be asked to consider continuing the penny sales tax that goes toward constructing new schools, adding classrooms to existing schools, renovating existing facilities, and providing classroom resources and technology for Paulding County students.

**E-SPLOST**

*Building On Our Progress!*

**REFERENDUM  
NOV. 7, 2023**

## What is E-SPLOST (Education Special Purpose Local Option Sales Tax)?

- One-cent sales tax on all eligible retail sales in Paulding County.
- Not a new tax, but a continuation of the current E-SPLOST program.
- It is a consumption tax, not a property tax.
- Everyone who makes a purchase contributes to our schools.
- Cannot be used for operating expenses.
- We can educate but we cannot advocate for SPLOST.

# E-SPLOST

*Building On Our Progress!*

*Building On Our Progress!*

REFERENDUM  
NOV. 7, 2023

- In 2011, school bond millage rate eliminated.
- Debt Service (principal and interest) shifted from property tax millage to sales tax.
- Removed tax burden from property owners, shifted to purchasers of certain goods and services in Paulding County (resident or not).
- **A bond millage of approximately 1.700 would be required to meet FY2024 debt service.**

# MAINTENANCE VS. CAPITAL IMPROVEMENT

COMMUNITY  
MEETINGS

## What is Maintenance?

- Attention to the building beyond the scope of the custodian, such as patching a roof leak or repairing an HVAC component that does not work, painting a wall or room, replacing broken floor tiles.
- Buildings of any age require maintenance to some extent!

## What is Capital Improvement?

- As buildings age, major building components eventually come to the end of their expected life-cycle.
- When building systems reach this point, a capital improvement program is utilized to replace the entire aged building system.
- Capital projects are entire roof replacements, HVAC systems, new generators, painting entire classroom wings, etc.

# FACILITIES MASTER PLAN

COMMUNITY  
MEETINGS

## Why Do We Need a Facilities Master Plan?

- Provides a data-driven path forward integrating information from multiple divisions to strategically identify capital projects.
- Enables the school district to prioritize and schedule capital needs to balance available resources and available funding.
- Set clear standards for facilities and educational program components.

# FACILITIES MASTER PLAN

COMMUNITY  
MEETINGS

# FACILITIES MASTER PLAN

COMMUNITY  
MEETINGS

## Building Condition Study

- Helps track individual needs at each facility.
- Each facility is evaluated using the same criteria and then scored.
- Accounts for building components with lifecycles that will expire in the future.
- Considers buildings with additions of varying ages.

## Ed Specs & Design Standards

- All district-funded building components comply with district standards.
- Necessary to maintain consistency.

# BUILDING CONDITION STUDY

## COMMUNITY MEETINGS

### Age

- Building ages range from 69 years old to brand new.
- Average age of school buildings in PCSD is 28 years.
- Older buildings score lower.

### Density

- Larger densities of students contribute to accelerated wear and tear.
- When density is above average, the score is decreased.

### Needs

- Critical vs. Non-Critical.
- Critical needs impact instruction when systems or components fail.
- Non-critical needs do not impact instruction

### Building Condition Study

This study examined the conditions of each facility and identified areas for improvement. Included in this study is an evaluation of the age of buildings, project priorities, and building dispositions.

- Building Condition Study**

### BUILDING CONDITION STUDY

#### Background

Buildings of any age, require maintenance to some extent. Routine maintenance is defined as attention to the building beyond the scope of the custodian, such as patching a roof leak or repairing an HVAC component that does not work. As buildings age, major building components eventually come to the end of their expected life cycle. When building systems reach this point, a capital renewal program is utilized to replace the entire aged building system.

A building condition study identifies capital building deficiencies and assigns costs so the building systems in need of replacement can be tracked, prioritized, and scheduled when funding is available. The building condition study enables the school district to build and renovate in a way that will have the most significant impact on our students and communities with the funding available. It provides a data driven path forward to position the school district in the best possible outcome for the future and it provides consistency amongst the campuses by building according to the district standards.

#### Scope of Review

The building condition study should assist the school district in completing renovations that will have the most significant impact on our schools. To best accomplish this goal, the building condition study reviews multiple factors in determining the overall condition of a building. Schools are assessed on both critical systems and non-critical system needs. Critical needs are those that impact instruction when building systems fail. These include, but are not limited to, HVAC, plumbing, roofing, and fire alarm. Non-critical needs are those that do not impact instruction when building components are at the end of their lifespan. These non-critical needs may include paint, carpet, and other items that may typically be addressed through maintenance versus capital projects.

In addition to the building needs, to forecast the buildings' conditions over the next ten years, it is important to utilize other factors including building age and building density as it relates to student enrollment. It is reasonable to predict that facilities will require more attention as they become older. Additionally, schools that have greater student density will naturally exhibit more wear and tear. By scoring and weighting these factors at each facility, the district can identify schools and future renovations according to their scores on both critical and non-critical needs. Below is the scoring scale and building classifications used in the building condition study.

### Paulding County School District Capital Improvement Program

As we build new schools and facilities, or renovate existing schools and facilities, the Paulding County School District Capital Program is committed to the belief that student success is best achieved in a future-focused, supportive, and safe learning environment. To that end, our plan provides for fiscal responsibility, informed and coordinated goals for long-term needs in growth, while also continually enhancing the current facilities through these key program areas:

- Forecasting future enrollment and classroom capacity needs
- Designing facilities to meet program needs of students
- Using comprehensive educational and design specifications to analyze building needs
- Prioritizing projects based on Master Facility Plan and Georgia Department of Education Local Facilities Plan
- Managing scope, schedule, and budget within the context of capital cash flow

Capital Projects, whether new builds or renovations and modifications, are completed in collaboration with key internal and external stakeholders. This communication ensures that the project and program meets community, local, and state standards and service.

The process of capital construction is completed in four key phases:

Concept

→

Planning/  
Design

→

Construction

→

Completion

While there may not be an active project at every school and facility, every school and facility is included in the plan. This site is designed to ensure that all schools are informed of school-based projects and to inform our community of sound capital fund management from State Capital Outlay awards to E-SPLOST and bonds.
