Purpose of Tonight's Meeting:

- Update you on E-SPLOST VI
- Show you how we could continue “Building on Our Progress” with SPLOST VII
- Hear your input and feedback
- Nov. 7 referendum
- End at 8:00 p.m.

Tonight's Agenda (6:30 p.m. - 8:00 p.m.):

- SPLOST VI and VII Presentations
- Types of Capital Improvements
 - ✓ Debt Service
 - ✓ Renovations
 - ✓ New Construction
- Facilities Master Plan Introduction
- Hear your input and feedback
 - ✓ Poll Questions and Q&A
 - ✓ Meet & Greet

TIMELINE

COMMUNITY MEETINGS

We Are Here

Disclaimer: With approximately 2 ½ years remaining on SPLOST VI and, if approved, SPLOST VII potentially extending to 2031, collections and the projects they fund could change for a host of reasons. With the exceptions of the referendum requirements (the language of the referendum) and debt service, proposed projects and dollar amounts are subject to change based on evolving conditions.

PROJECTED FUNDING

COMMUNITY
MEETINGS

E-SPLOST VII Projected Collections:

60 Months*	\$167.4 million
Projected State Reimbursement	\$ 9.4 million
<hr/>	
Total Projected Funding	\$176.8 million

*Based on 3 percent growth

*Collection ceiling, listed on referendum: \$197 million

*Referendum provides option to issue bonds, similar to previous E-SPLOSTs

Paulding County Board of Tax Assessors
240 Constitution Blvd. Room #3008
Dallas, GA 30132
(770) 443-7606

If you believe that the fair market value placed upon your property by the Board of Tax Assessors is higher than it should be and if you can provide supporting evidence (mortgage appraisal, sales of comparable properties, etc.), then it may be in your best interest to file a property tax return with the Board of Tax Assessors requesting a review of your property appraisal. This must be done not later than April 1, 2019. Information on how to file a property tax return can be obtained from the address above.

Building Condition Study

This study examined the conditions of each facility and identified areas for improvement. Included in this study is an evaluation of the age of buildings, provided by the district's facilities department.

- Building Condition Study**

BUILDING CONDITION STUDY

Background

Buildings of any age, require maintenance to some extent. Routine maintenance is defined as attention to the building beyond the scope of the custodian, such as patching a roof leak or repairing an HVAC component that does not work. As buildings age, major building components eventually come to the end of their expected life cycle. When building systems reach this point, a capital renewal program is utilized to replace the entire aged building system.

A building condition study identifies capital building deficiencies and assigns costs so the building systems in need of replacement can be tracked, prioritized, and scheduled when funding is available. The building condition study enables the school district to build and renovate in a way that will have the most significant impact on our students and communities with the funding available. It provides a data driven path forward to position the school district in the best possible outcome for the future and it provides consistency amongst the campuses by building according to the district standards.

Scope of Review

The building condition study should assist the school district in completing renovations that will have the most significant impact on our schools. To best accomplish this goal, the building condition study reviews multiple factors in determining the overall condition of a building. Schools are assessed on both critical systems and non-critical system needs. Critical needs are those that impact instruction when building systems fail. These include, but are not limited to, HVAC, plumbing, roofing, and fire alarm. Non-critical needs are those that do not impact instruction when building components are at the end of their lifespan. These non-critical needs may include paint, carpet, and other items that may typically be addressed through maintenance versus capital projects.

In addition to the building needs, to forecast the buildings' conditions over the next ten years, it is important to utilize other factors including building age and building density as it relates to student enrollment. It is reasonable to predict that facilities will require more attention as they become older. Additionally, schools that have greater student density will naturally exhibit more wear and tear. By scoring and weighting these factors at each facility, the district can identify schools and future renovations according to their scores on both critical and non-critical needs. Below is the scoring scale and building classifications used in the building condition study.

What Is Layered Security?

Security professionals recommend that for large organizations such as a school district, the best approach to safety and security is a layered approach. Layered security begins with a comprehensive threat assessment and continues through the other elements listed. Here is a summary of security layers in the Poudre Valley School District.

VISIBILITY	DISTRICT WIDE
SECURITY COUNCIL	Local Law Enforcement
PERIMETER	State Police
PROPERTY PERIMETER	Building Security
BUILDING PERIMETER	Classroom Interior

Total	\$ 176.9 million

* Additional Projects includes estimates for specialized renovations like Safety & Security (\$4.0m), Fine Arts (\$1.5m), Traffic & Paving (\$1.9m), Playgrounds (\$1.4m), Technology (\$1.3m), Recurring Projects (\$1.3m), Miscellaneous (\$1.0m), and Future Capital Projects (\$3.0m)

What is E-SPLOST (Education Special Purpose Local Option Sales Tax)?

- One-cent sales tax on all eligible retail sales in Paulding County.
- Not a new tax, but a continuation of the current E-SPLOST program.
- It is a consumption tax, not a property tax.
- Everyone who makes a purchase contributes to our schools.
- Cannot be used for operating expenses.
- We can educate but we cannot advocate for SPLOST.

Paulding County School District Capital Improvement Program

As we build new schools and facilities, or renovate existing schools and facilities, the Paulding County School District Capital Program is committed to the belief that student success is best achieved in a future-focused, supportive, and safe learning environment. To that end, our plan provides for fiscal responsibility, informed and coordinated goals for long-term needs in growth, while also continually enhancing the current facilities through these key program areas:

- Forecasting future enrollment and classroom capacity needs
- Designing facilities to meet program needs of students
- Using comprehensive educational and design specifications to analyze building needs
- Prioritizing projects based on Master Facility Plan and Georgia Department of Education Local Facilities Plan
- Managing scope, schedule, and budget within the context of capital cash flow

Capital Projects, whether new builds or renovations and modifications, are completed in collaboration with key internal and external stakeholders. This communication ensures that the project and program meets community, local, and state standards and service.

The process of capital construction is completed in four key phases:

Concept

→

Planning/
Design

→

Construction

→

Completion

While there may not be an active project at every school and facility, every school and facility is included in the plan. This site is designed to ensure that all schools are informed of school-based projects and to inform our community of sound capital fund management from State Capital Outlay awards to E-SPLOST and bonds.
